

# Guided Research & Mentorship Program

Work 1-1 with a top university professor/researcher/scholar or business leader!

This program allows students to expand and apply their knowledge of an academic subject in ways not possible within school courses

Our team includes 75+ professors/scholars/researchers and business leaders from top universities such as Oxford, Cambridge, Yale, and Columbia

## Here are a few of our amazing professors/scholars:

Dr. Peter Kempthorne - MIT  
Lecturer | Statistics,  
Financial Mathematics

Dr. Sean Bradshaw - Columbia  
Professor | Mechanical Engineering

Dr. Terence Renaud - Yale  
Lecturer | Humanities  
Program and Department of  
History

Dr. Bruce Campbell - Brown  
Asst Professor | Computer Science (Research)

Dr. Eric Golson - Surrey  
UG Programme Leader &  
Teaching Fellow | Economics

Dr. Tayyeb Shabbir - UPenn  
Professor | Finance

## Possible Mentorship Plans:

### Internship

Work as an assistant or collaborator on one of the mentor's current projects

### Research Project

Work on a new research project decided upon by you or together with your mentor

### Report/Publication

Work with your mentor on the creation of a written report which could become a publication

### Deeper Learning

Learn from your mentor to increase your knowledge set and level of expertise within a subject you want to study

With hard work, students not only complete a research project or written work/publication, but can also earn a letter of recommendation - an influential asset for future admissions or employment goals!

## Program Details:

### Program Length

2-month program including weekly video-chat sessions and continuous email communication

### Location

Most Mentorships are conducted remotely so that students and mentors can be located anywhere in the world!

### Session time

Sessions last about 1 hour and are scheduled to fit both your availability and that of your mentor

### Support

Each Mentorship includes 24-hour support from a dedicated program coordinator
